PROFESSIONAL EXPERIENCE

OgilvyOne Worldwide **Bangkok, Thailand**
Front-End Web Developer Intern 07/2017 - 09/2017

- Developed and improved several sections in the Thai websites for **NIVEA** and **SHOW DC Mall** with Sitecore CMS using HTML, SCSS, and PHP, and for the company **Milo** with Drupal CMS
- Wrote and maintained functional specification documents based upon clients' needs
- Redesigned and launched HTML email templates (built using Foundation) for OgilvyOne's client **Samsung**

Bitsee **Seattle, Washington**
Android Developer Intern 01/2017 - 03/2017

- Implemented the application's tutorial section, allowing first time users to learn how to navigate and to use the app
- Developed and maintained the company's website (**bitsee.ai**), and optimized its SEO rankings to first position in 2017
- Oversaw the app's public testing period, conducting performance tests and interviewing 100+ volunteered testers

CP All **Bangkok, Thailand**
Android Developer Intern 07/2016 - 09/2016

- Developed a mobile app for **7-11 Convenience Store** in Thailand (9000+ stores as of 2017) that collected users' satisfaction ratings and uploaded them to an online storage server
- Built a front-end website using PHP and MySQL to retrieve the rating results and display them to registered users
- Assisted other co-workers on the app's wireframe and prototypes projects

PROJECTS

Institute of Electrical and Electronics Engineer (IEEE) Website 05/2017 - Present

- Served as the webmaster and web administrator for the university's organization
- Developed a custom-built Wordpress theme on top of an existing theme to produce a required design
- Link: students.washington.edu/hknieee/

SHOW DC Shopping Mall Website 07/2017 - 09/2017

- Fulfilled clients' and manager's expectation by optimizing existing web pages' scripts and code logics
- Produced wireframes and worked on existing Photoshop design templates to improve overall user experience
- Link: showdc.co.th

Soccer Score Updates using Command-Line-Interface for Liverpool Football Club 08/2017

- Python-based command-line-interface application that can retrieve soccer updates (results, fixtures) for Liverpool FC.
